EXAMINER'S AMENDMENT and REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Manware (Reg. No. 48,758) on 09-15-05.

The application has been amended as follows:

In the claims:

Cancel claims 14, 15, 18 and 20.

In claim 1, line 10: replace "and" with -- (c) determining whether the power supply in the main unit has enough power to activate the option pack fully and determining whether the third memory device on the main unit has enough memory capacity to store the applications and associated drivers stored on the second memory device of the option pack; and --.

In claim 1, line 11: replace "(c)" with -- (d) --.

In claim 17, lines 8-9: replace "unit and," with -- unit; (f) determining whether the main unit has enough power to activate the option pack fully and determining whether

Art Unit: 2112

the main unit has enough memory capacity to store the applications and associated drivers available on the option pack; and --.

In claim 17, line 9: replace “(f)” with -- (g) --.

In claim 19, line 1: replace “claim 18” with -- claim 17 --.

In claim 21, line 1: replace “claim 20” with -- claim 17 --.

In claim 24, line 6: delete “and wherein”.

In claim 24, line 7: replace “unit.” with -- unit; and wherein the main unit determines whether the main unit has enough power to enable the option pack fully and determines whether the main unit has enough memory capacity to store the applications and associated drivers available on the option pack. --.

2. Claims 1-13, 16-17, 19 and 21-31 are allowed.

The following is an examiner’s statement of reasons for allowance:

Reference Ishikawa et al. (US Patent 6,266,711) teaches option pack (11) to add additional functionalities to a main unit (10); the option pack comprising a first memory device configured to store an identification data and a second memory device configured to store one or more applications and drivers associated with the one or more applications; wherein the one or more applications and drivers are configured to be downloaded from the option pack to the main unit (col. 9 line 5 to col. 10 line 64). However, Ishikawa et al. does not teach determining whether the main unit has enough power to activate the option pack fully and determining whether the main unit has enough memory capacity to store the applications and associated drivers available on the option pack.

Art Unit: 2112

The claims include the limitation of determining whether the main unit has enough power to activate the option pack fully and determining whether the main unit has enough memory capacity to store the applications and associated drivers available on the option pack, which is not shown by the prior art of record in the combination as disclosed and claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
